授業のねらい・内容・方法								
This course aims to show students how to learn English independently. They will do this by developing interactive tasks, which they will design themselves as homework and use to teach each other during the next class. Every two weeks there will be a new theme. The first lesson will explain how to make the task. In the second lesson, students will exchange and do each other's tasks. In this way it is hoped students will see that they don't need a teacher to learn a foreign language.
